Software Engineer @GMS| Website Design and Maintenance ||
Multifaceted Freelancer || ML || AI
Peshawar District, Khyber Pakhtunkhwa, Pakistan

Summary

I'm a web and mobile app developer with a passion for creating
engaging and user-friendly digital solutions. As a WordPress
Developer at GQSource, I design and maintain websites using
WordPress and other web technologies, such as HTML, CSS, and
JavaScript. I'm currently working on two projects, MEgacooling and
Brothersz, that showcase my skills in responsive web design and
content management.

I have a Bachelor of Science in Software Engineering from
COMSATS Institute of Information and Technology, where I gained
a strong foundation in Python, Machine Learning, and Human-
Computer Interaction (HCI). I also have experience in creating
mobile applications using Flutter, Dart, and Firebase, such as a
virtual hospital app and an AR hotel menu app, that demonstrate
my creativity and innovation in solving complex problems. I'm
always eager to learn new skills and technologies, and I'm currently
expanding my expertise in React and Node.js to take my web
development skills to the next level. I'm excited about collaborating
on forward-thinking projects and contributing to the ever-evolving
tech landscape.

Experience

Global Marketing Services, Pakistan
2 months

Software Engineer
August 2024 - Present (1 month)
Islamabad, Islāmābād, Pakistan

- Designed working and responsive Prototyping(Web app) using Figma/ Adobe XD.
- Developed an health Care app using Flutter, Firebase, Authentication, CRUDE operation, pie charts , API Integrations.

Junior Software Developer
August 2022 - March 2023 (8 months)

Upwork
1 year 3 months

Mobile Application Developer
March 2023 - October 2023 (8 months)
Remote

As a software engineer with expertise in Flutter, I am proficient in developing and implementing efficient and scalable software solutions. With a strong background in Python programming.

I have the ability to build complex algorithms and data structures, automate repetitive tasks, and develop custom applications.

In addition, my proficiency in Flutter allows me to create high-quality, user-friendly mobile applications that deliver engaging experiences to users. Whether it's creating a new application from scratch or improving existing ones, I am committed to delivering software that is both functional and aesthetically pleasing.

The task that offer doing are :
1) Prototyping (Figma)
- Low fidelity
- Medium fidelity
- High fidelity

2) Flutter App Functionality
- Authentication
- Figma To Flutter
- Customs Screen Design
- Error Solving in App(Gradle etc)
- Booking System
- Payment Module
- Tracking Module

- Connecting App to Flask server(ML projects)
- Searching Functionality
- Connecting Firebase
- Package Deprecated Solver

Software Developer
August 2022 - March 2023 (8 months)

Projectspro
Web Developer
April 2023 - September 2023 (6 months)
Islamabad, Islāmābād, Pakistan

Some of websites that I have worked on are:

1) GMS (Global Marketing Service)

2) LDSpharma

3) Projectspro

4) Industranslation

5) Assignmentspro

6) DeeptapiAuction

7) Ntxjet

8) CompassHotelConsulting

and many more It kind of 20+ websites that I have developed but a few of them are freelance projects

AWS work

1) I created a Python script that basically compares our website URL with the competitor's URL gives us the details of it and saves the data into csv file.

I then deployed that script to AWS through the Ec2 instance and also schdule it for the 1 date of each month and some modifications were made. It will get the datasets from the Bigquery, then the script will run, and the result will be stored in the Planetscale.

Fiverr
Web Developer
